Data–Driven Security

MyEvolv and Evolv Insights®

Many security leaders need comprehensive data to effectively manage entry points, including the volume of visitors, number and types of threats detected, and other operational metrics to help drive efficiency. The lack of visibility into these areas can lead to a disjointed response to incidents, plus a sub–optimal staffing and visitor experience.

Evolv not only helps deliver reliable and efficient screening solutions, but also provides customers with operational metrics to help enable more proactive, data–driven security.

Security Operations Visibility and Actionable Analytics

As the companion application to the Evolv Express® concealed weapons detection system, Evolv Insights® helps provide security teams with powerful web and mobile control over their systems along with visual dashboards, analytics, and regular automated reports to help drive operational efficiency. Insights is accessible via the MyEvolv web portal and mobile app.

MyEvolv and Evolv Insights® are key components of the Evolv Safer Experience System, a connected and layered approach that integrates people and technology to help enhance security, situational awareness, and threat response. Unlike disparate point solutions, the Safer Experience System combines brandished firearm detection, concealed weapons detection and integrated data analytics into a unified security infrastructure.

MyEvolv

Through the MyEvolv web portal and mobile app, security leaders can more easily make decisions off–site and in real–time, such as viewing and adjusting Express sensitivity settings fleet wide, implementing software updates, configuring alert tags, reviewing alert images, and configuring Request Assistance Express tablet messages, all without disrupting operations. Daily, weekly and monthly push reports help deliver operational metrics right to your inbox without the need to login to MyEvolv.

Evolv Insights

The powerful Evolv Insights analytics dashboard helps allow security leaders to explore and compare critical data around visitor flow, alarm statistics, threat counts, and system performance. By understanding these key security metrics, leaders can make informed decisions on resource allocation at each entrance, for example. If any type of governing body reporting is required, Evolv Insights can help leaders pull the information, without any patron personal identifiable information (PII).

Evolv Insights Delivers

Utilization data to better optimize security staffing

Real-time analytics that can be displayed in your SOC

Tracking of weapons found at your venue and trends over time

Accessibility via the mobile app for real-time system access anywhere you are

Enhanced access to alert images for various security roles
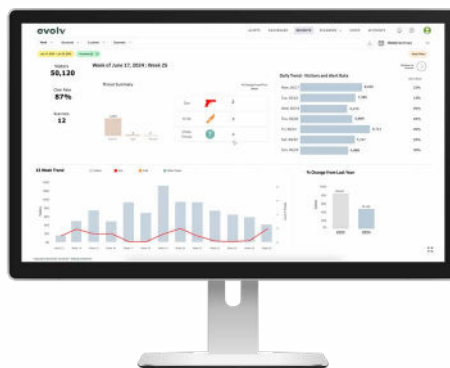

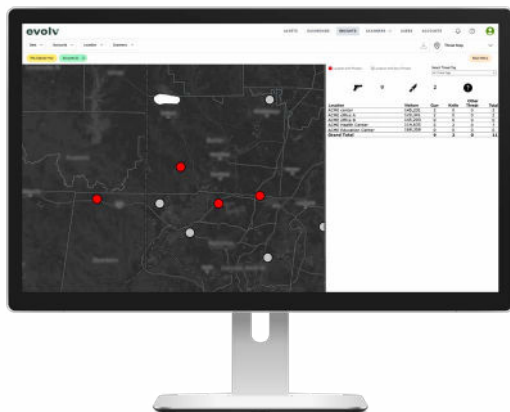

Tailored Insights Hub by Industry

Depending on whether you manage security for a school district, hospital system or sports stadium, the insights you need at your fingertips may differ. We tailor the Insights experience to the reports we think you'll need the most.

Multi-Venue Threat Map

The threat map report offers School District Superintendents, Hospital Administrators, City Public Safety leaders, and large, multi-venue Entertainment/Sports leaders overseeing multiple locations an intuitive geographic map to help internally benchmark across their fleet to observe and evaluate visitor flow, alert rates, and threat counts.

Daily, Weekly or Monthly Report Summary

Access important data at a frequency suitable for committee or staff meetings, with higher-level metrics such as visitor counts, alert rates, alert tag percentages and threat counts, helping support better staffing decisions, reporting needs, and tracking of trends over time.
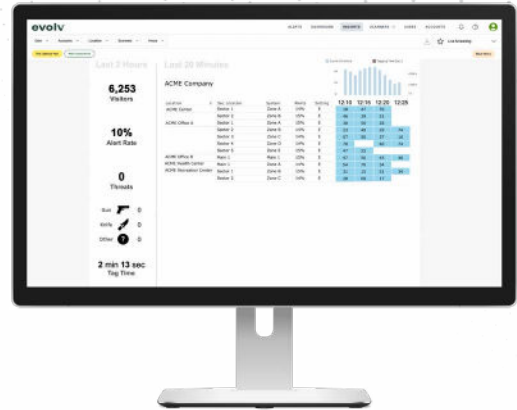

What-If Analysis

Refine Evolv Express sensitivity settings by performing "What if" analysis on historical scan data to see alarm rates on alternate settings, helping drive better decisions around ConOps and staffing.

On-the-Go Insights

Real-time dashboards can show up-to-the-minute data (ingress numbers, screening time, and verified alerts) that could be displayed in your SOC or accessed from your mobile app to make quick operational adjustments as needed. This could include shifting resources (staff) based on flow at multiple entrances.

MyEvolv Mobile App

The MyEvolv mobile app makes it possible for users to access summary level reports and features of the MyEvolv desktop wherever they are.

About Evolv Technology

Evolv Technology (NASDAQ: EVLV) is transforming human security to help make a safer, faster, and better experience for the world's most iconic venues and companies as well as schools, hospitals, and public spaces, using industry leading artificial intelligence (AI)-powered screening and analytics. Its mission is to transform security to create a safer world to live, work, learn, and play. Evolv has digitally transformed the gateways in many places where people gather by enabling seamless integration combined with powerful analytics and insights. Evolv's advanced systems have scanned more than a billion people since 2019. Evolv has been awarded the U.S. Department of Homeland Security (DHS) SAFETY Act Designation as a Qualified Anti-Terrorism Technology (QATT) as well as the Security Industry Association (SIA) New Products and Solutions (NPS) Award in the Law Enforcement/Public Safety/Guarding Systems category, as well as Sport Business Journal's (SBJ) awards for "Best In Fan Experience Technology" and "Best In Sports Technology". Evolv®, Evolv Express®, Evolv Insights®, and Evolv Visual Gun Detection™ are registered trademarks or trademarks of Evolv Technologies, Inc. in the United States and other jurisdictions.
